

Milestone 1: Data Collection & Project Foundation

Introduction:

The Unified Defense Analytics & Comparison Dashboard is a comprehensive data analytics project designed to collect, process, analyze, and visualize global military strength metrics for 140+ countries.

Problem Statement:

Military strength data is available online but not structured for analytical comparison. Manual comparison is time-consuming and inefficient.

Objectives:

- Automate data extraction
- Create structured dataset
- Perform country-level analysis
- Generate rankings
- Develop interactive dashboard

System Architecture Overview:

Data Source → Scraping → Raw Dataset → Cleaning → Analysis → Dashboard

Layer 1: Data Collection Layer (Web Scraping Scripts)
